

Effortless
PROTECTION

Drop-N-Lock™ lids provide effortless protection for underground components. The audible click ensures your components are safe as soon as you close the lid. Available for our Carson® line in a variety of standard sizes for new or existing enclosures

DROP-N-LOCK™

Tamper-resistant lids for effortless protection.

Click the lid closed and the Drop-N-Lock™ system automatically engages, securing your critical system components. The discrete access point deters vandals and protects against unauthorized access. The weather-resistant, stainless steel Drop-N-Lock™ mechanism is available on a variety of lid sizes and unlocks with common hand tools, making authorized maintenance easy for technicians. The discrete access point deters unauthorized access and provides single-motion keyed disengagement with common tools.

Light Duty
PEDESTRIAN/GREENBELT

FEATURES:

- Common sizes for new or retrofit enclosures
- Audible locking confirmation
- No exposed bolt or nut hardware
- 1324 size and larger include a dual lock system
- Color and marking choices
