Chances are, you're already using one of CommScope's trusted, quality products or solutions in your network. Through acquisitions spanning four decades, CommScope has built a comprehensive product portfolio spanning telecom, MSO, wireless, and enterprise networks. Below are some of CommScope's respected and award-winning products.

COMMSCOPE

Founded in 1976, CommScope grew rapidly with the rise of the cable TV industry.

SYSTIMAX

Acquired in 2004, SYSTIMAX's structured cabling products for the enterprise has a storied heritage from Avaya, Lucent Technologies, and AT&T.

ANDREW

Acquired in 2007, Andrew's antenna and wireless infrastructure products for mobile operators is well known in the industry for its quality and performance.

TE Connectivity BNS

In 2015, the enterprise, telecom, and wireless business (known as BNS, or Broadband Network Solutions) of TE Connectivity (formerly **Tyco Electronics**) was acquired by CommScope. Product lines previously acquired by TE BNS include **ADC, AMP NETCONNECT, KRONE, LGI WIRELESS, and RAYCHEM.**
